

VAIBHAV SATHE

Java Backend Developer | Spring Boot | REST APIs | React

☎ +91 797-282-4554 ✉ vaibhav.sathe.159@email.com 🔗 [linkedin.com/in/vaibhav-sathe89](https://www.linkedin.com/in/vaibhav-sathe89) 🐙 github.com/vaibhavCodes18

Career Objective

Java Full Stack Developer with experience building scalable backend systems and full-stack applications using Spring Boot, React.js, Redis, MySQL, PostgreSQL, and MongoDB. Skilled in developing RESTful APIs, implementing secure authentication and email verification workflows, and containerizing applications using Docker. Experienced in designing clean layered architectures, optimizing backend performance, and building secure, production-ready applications.

Education

Ballarpur Institute of Technology
Bachelor of Technology in Computer Science

OCT 2022 – Jun 2026
Ballarpur, Maharashtra

Experience

Full Stack Java Trainee & Intern | *Kapil IT Skill Hub* | July 2025 – Mar 2026

- Built full-stack applications using Spring Boot, React, and MySQL, implementing RESTful APIs for role-based systems.
- Designed scalable backend using JPA and Hibernate with proper entity relationships and layered architecture.
- Implemented secure authentication and CRUD operations, ensuring reliable data handling and system performance.
- Developed and deployed 35+ REST APIs and containerize applications using Docker.

Technical Skills

Language : JavaScript (ES6), SQL, Java.

Frontend : React.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS.

Backend : Spring Boot, Spring Security, REST APIs, Authentication, JPA, Hibernate, OAuth.

Databases: MySQL, PostgreSQL, MongoDB, Redis.

Tools : Git, GitHub, Linux, Docker, Maven, Cloudinary

AI : LLM API Integration.

Projects

Project Approval Management System | github.com/vaibhavCodes18/Project-Approval-System

- Built a role-based backend system using Spring Boot and MongoDB to streamline multi-stage project approval workflows across Student, Guide, and HOD roles.
- Developed RESTful APIs and implemented secure authentication using Spring Security, JWT, and SMTP-based email verification.
- Containerized the application using Docker to enable consistent deployment and scalable backend execution across environments.

Employee Management System | github.com/vaibhavCodes18/4bitLabs-Employee-Management-System-Backend

- Architected a role-based system with 4 dashboards (Admin, Analyst, Trainer, Counsellor) to manage users, batches, and workflows.
- Developed 35+ RESTful APIs using Spring Boot, JPA, and Hibernate for scalable backend operations.
- Implemented secure authentication using Spring Security and JWT with HttpOnly cookies to enhance application security.
- Resolved database integrity issues by implementing custom cascade deletion logic to handle foreign key constraints.
- Improved code quality using SonarQube and SonarCloud by fixing code smells and reducing vulnerabilities.

Achievements

- Winner, Blind C Coding, BIT Ballarpur.
- Finalist, HackYourPath 6.0 at HITAM Hyderabad.
- Finalist, CIH 2.0 At Suryodaya College of Engineering & Technology - Nagpur.

Certifications

Certified Full Stack Developer, Kapil Skill Hub : (Link)

GeeksforGeeks GfG 160 - 160 days Completion Certificate: (Link)
